About the Webcast

SNIA has embarked on an initiative to determine today's requirements for the long-term digital preservation of information. A follow-up to the 100-Year Archive Study SNIA did 10 years ago; it's now time to research the impact technology changes are having on information retention and preservation in the data center. Plus you'll have an opportunity to share your experiences by participating in the new 2017 100-Year Archive Survey.

Join this webcast for an enlightening discussion on:

- The need for digital preservation of Big Data
- How to keep stored digital assets accessible, usable and undamaged

- Accessing information past the life of any particular storage system or technology
- Keeping long-term digital preservation affordable
- How long-term information should be stored, secured and preserved
